

GrasCell® Drain Tube 300 (DT300) is a lightweight, durable drainage system for green roofs and planters. Its slotted design drains water quickly, prevents waterlogging, and can be stacked for deeper boxes. Wrapped with a mesh to keep out debris, it connects securely to standard drain pipes.

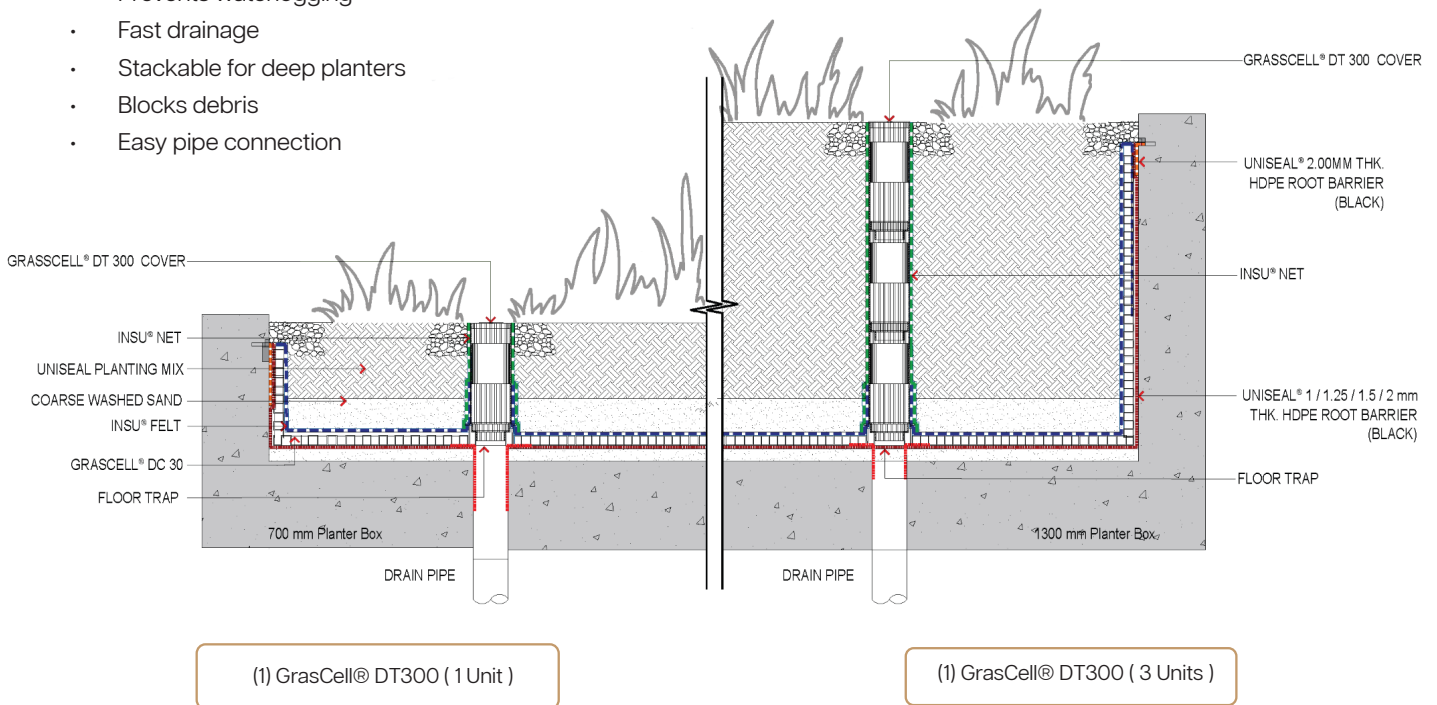

APPLICATIONS:

- Green roofs
- Planter boxes
- Rooftop gardens
- Landscaped areas needing drainage

Tech Specs		UOM	GrasCell® DT300
SGBC Green Product			✓✓✓✓
