

# uniseal Bitumen Primer

Uniseal® Bitumen Primer is a low viscosity bituminous compound used as a penetrating primer for better adhesion of its range of Pre-formed Membrane to substrates.

It also acts as protection for concrete against biological growth and polluted soil.

## APPLICATIONS:

- Primer for bitumen membranes.
- Protects concrete from soil and growth.

## BENEFITS:

- Better adhesion.
- Prevents damage.
- Easy to use.

Tech Specs	UOM	Uniseal® Bitumen Primer
Material		Bituminous Compound
Colour:		Black
Pack Size	l	20
Density	kg/l	0.89
Solid Content	%	40
Viscosity @ 25°C	cP	50 to 100
Flash Point	°C	38
Application:		1 coat
Nominal Coverage	m <sup>2</sup> /l	6
Drying Time: Touch Up	hr	1/2
Thorough	hr	3
