DC30 1000

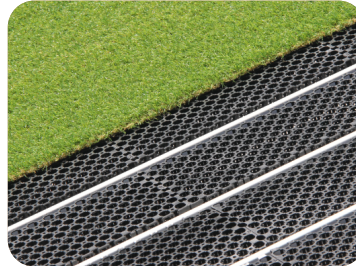

Our GrasCell® DC Series are lightweight, strong drainage panels that replace granite aggregates and protect waterproofing. They offer high water flow, support soil and foot traffic, come in 20–50 mm stackable thicknesses, interlocking for easy installation, and are available in standard or fire-resistant types.

APPLICATIONS:

- Roof decks
- Planter boxes
- Sub-soil drainage under landscaping

BENEFITS:

- Lightweight drainage solution
- Fast water flow
- Protects waterproofing
- Strong and stackable
- Easy interlocking panels
- Multi- Directional Installation type
