

uniseal Patching Compound

Uniseal® Patching Compound is a cement-based, water-resistant mix made of 50% Portland cement and 50% Easi Plaster Eco (Part A), enhanced with Uniseal® concrete strengthener (Part B). It forms a firm, highly workable paste ideal for sealing cracks, joints, and cavities before applying a waterproofing membrane.

APPLICATIONS:

- Seal cracks in concrete
- Fill joints and gaps
- Repair small holes and damaged areas
- Prepare surfaces before waterproofing
- Minor concrete patch repairs

BENEFITS:

- Water-resistant
- Strong bonding to concrete
- Easy to apply
- Improves surface strength
- Creates a smooth base for waterproofing
- Helps prevent water leaks

Tech Specs	UOM	Uniseal® Patching Compound
Material		
Binder		Ordinary Portland Cement / Blastfurnace Slag
Filler		Graded Limestone Powder
Strengthener		Uniseal® Concrete Strengthener
Colour		Grey
Pack Size	l	20
Sulfate Content	%	≤ 3.5
Chloride Content	%	≤ 0.1
Initial Setting Time	h	1 to 3
Crack Bridging	mm	≤ 13
