

GrasCell® GP40 is a lightweight, strong turf paver that protects roots and stabilizes soil under heavy vehicles. Its 90% open, interlocking cells support healthy root growth, spread loads, and allow drainage. It meets truck-access needs and can also form porous gravel pavements for car parks. Flexible interlocks ensure secure installation on gently uneven ground.

APPLICATIONS:

- Turf areas with vehicle access
- Fire/maintenance access routes
- Porous gravel car parks
- Reinforced green surfaces

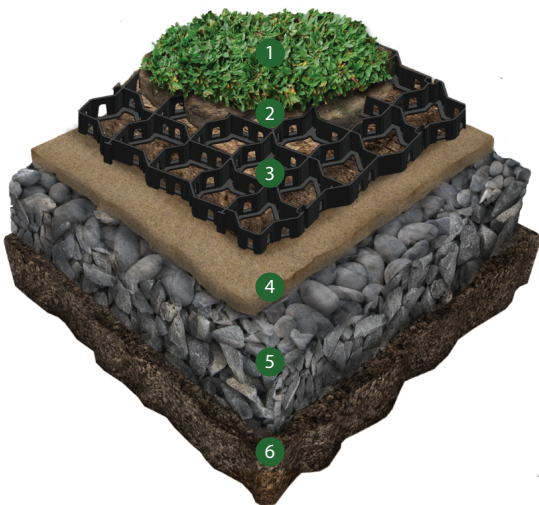

BENEFITS:

- Protects roots under heavy loads
- Supports healthy root growth
- Improves drainage
- Provides strong, stable surface
