

A lightweight green wall cassette with a hydroscopic layer for continuous hydration, mounted via stainless steel studs. The system includes the cassette, back cover, hydroscopic layer, geotextile layer and Planting Media.

APPLICATIONS:

- Vertical green walls for any space
- Indoor and outdoor living walls
- Façade greening for aesthetics and environment
- Improves air quality and insulation

BENEFITS:

- Lightweight and easy to install
- Continuous hydration with Hydroscopic Layer
- Secure mounting with stainless steel studs
- Modular for flexible layout and maintenance

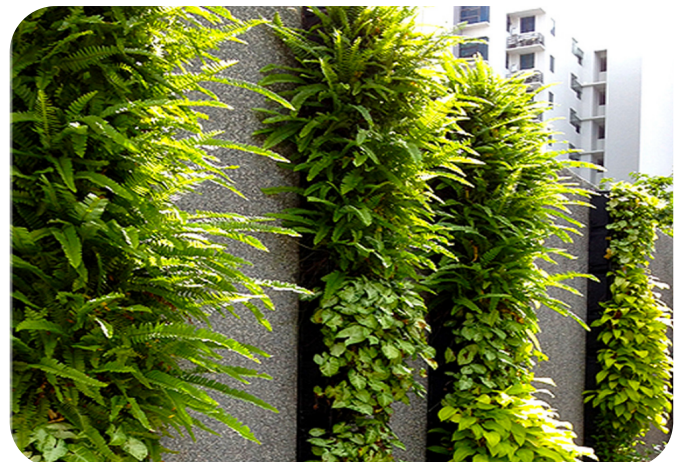

- (1) Back Cover
- (2) Hydroscopic Layer
- (3) Planting Media
- (4) Geotextile Layer
- (5) Front Cover
- (6) Selected Green Wall plants

Tech Specs		UOM	PlanterCell® 75
